1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 4/22/2004 has been entered.

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 9-14, 16-19, 23-30, 3250, 52-56, 84-132 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-40 of U.S. Patent No. 5,636,643 in view of Zamoerowski.

Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims are directed to the same device for treating or healing wounds having a sealing means for maintaining a reduced pressure, a suction

Art Unit: 3736

pump or means to generate a reduced pressure or vacuum means and a screen. While the wording may be slightly different it appears the claims are directed to the same subject matter and are not patentably distinct from one another. Further some of the claims include a fluid trap or collection means, Zamierowski discloses a similar device and teaches that it is well known to include a collection means.

Applicant states that two terminal disclaimers have been filed, however it appears that the application has two copies of the same terminal disclaimer. As such the above rejection is repeated for the double patenting rejection based upon the rejection for which the terminal disclaimer is not present.
